 = MATCH NOTCH
 = 180° ROTATION LINE

BEHIND THE SCENES

STEP REPEAT 1

ONE DIRECTION

WIDTH OF REPEAT TILE SHOULD BE
HALF OF THE PRINTABLE PAPER WIDTH
(IN THIS EXAMPLE $16'' \times 2 = 34''$)

Welcome to the BrightSide™

 = MATCH NOTCH

BEHIND THE SCENES

STEP REPEAT 2

ONE DIRECTION

WIDTH OF REPEAT TILE SHOULD BE
HALF OF THE PRINTABLE PAPER WIDTH
(IN THIS EXAMPLE $16'' \times 2 = 34''$)

Welcome to the BrightSide™

 = MATCH NOTCH

BEHIND THE SCENES

STEP REPEAT 1

TWO-WAY DIRECTION
WIDTH OF REPEAT TILE SHOULD BE
HALF OF THE PRINTABLE PAPER WIDTH
(IN THIS EXAMPLE 16" x 2 = 34")

Welcome to the BrightSide™

 = MATCH NOTCH

 = 180° ROTATION LINE

BEHIND THE SCENES

MIRROR REPEAT

ONE DIRECTION

PRINTABLE PAPER WIDTH
IN THIS EXAMPLE 24"

Welcome to the BrightSide™

/// = MATCH NOTCH

BEHIND THE SCENES

MIRROR REPEAT

TWO - WAY DIRECTION

PRINTABLE PAPER WIDTH
IN THIS EXAMPLE 24"

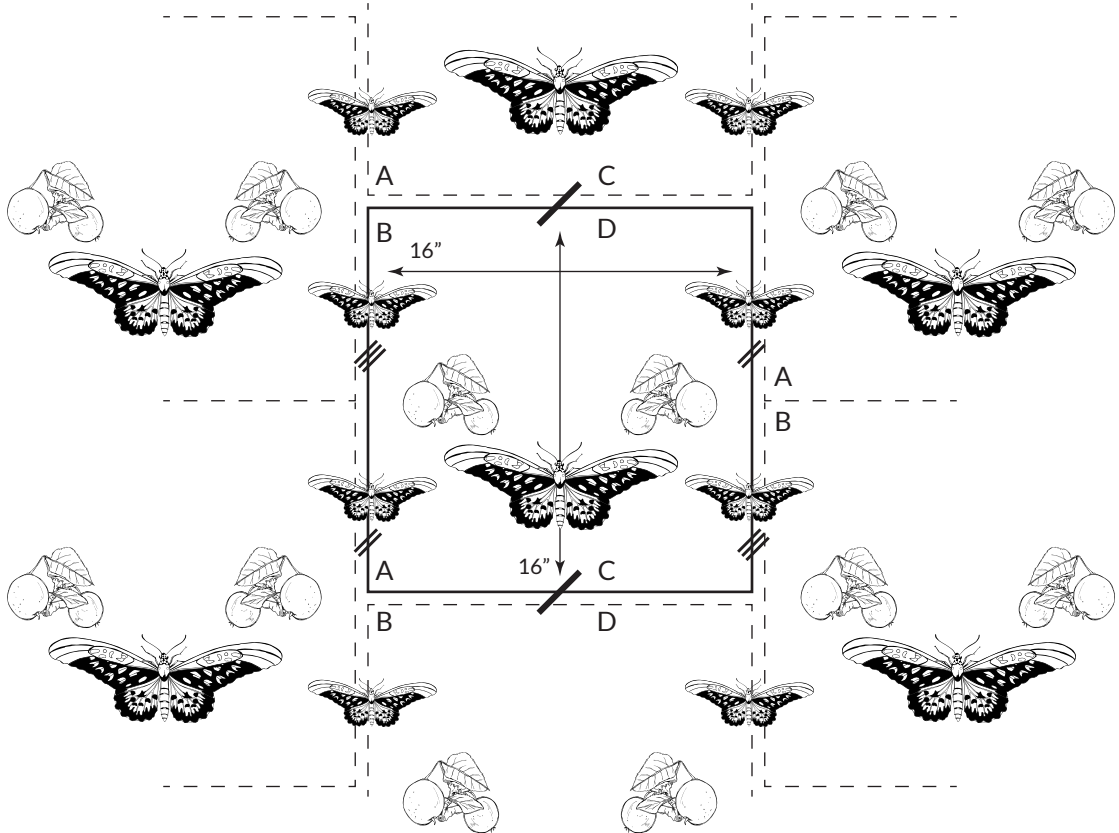

Welcome to the BrightSide™

 = MATCH NOTCH

BEHIND THE SCENES

STEP MIRROR REPEAT 1

ONE DIRECTION
WIDTH OF REPEAT TILE SHOULD BE
HALF OF THE PRINTABLE PAPER WIDTH
(IN THIS EXAMPLE $16'' \times 2 = 34''$)

Welcome to the BrightSide™

 = MATCH NOTCH

BEHIND THE SCENES

STEP MIRROR REPEAT 1

TWO-WAY DIRECTION

PERFECT METHOD FOR A SYMMETRICAL DESIGN

WIDTH OF REPEAT TILE SHOULD BE HALF OF THE PRINTABLE PAPER WIDTH
(IN THIS EXAMPLE 16" x 2 = 34")

BEHIND THE SCENES

THE MATH 1

REPEAT TILE

Photoshop is best for me for repeat tiles.

I'll copy and paste my vector art into the file as pixels. (Note: Smart Objects don't improve my desired output)

My Photoshop PRINT file for this example is 16" x 16" 300 dpi CMYK. The pixels are 4800 X 4800.

The pixel ratio is important for the mathematical movement of the illustration to match on the edge for a seamless print.

Welcome to the BrightSide™

BEHIND THE SCENES

THE MATH 2

STEP REPEAT TILE

Do Math 1 (M1) to move illustration to the correct side left or right.

The only Math needed is $1/2$ of Y

In this example it $4800 / 2 = 2400$

Welcome to the BrightSide™

 = MATCH NOTCH

BEHIND THE SCENES

THE MATH 3

STEP REPEAT TWO WAY ONLY

Watch Video 9 for explanation.

The basic principle here is to have matching characters on the seam below the red line.

Green Butterfly

Get the distance from Y in photoshop

$$Y - 2400 = A$$

Blue Butterfly

Copy Green, rotate 180

To get B

$$4800 - A = B$$

4800

0

X

Green Butterfly

Get the distance from X in photoshop

$$4800 - X = C$$

Blue Butterfly

$$4800 + C = D$$
